(54) Title: STRUCTURE OF A SPORTS FOOTWEAR FOR ROLLER SKATES OR ICE SKATES

(57) Abstract: The present invention refers to a structure for a footwear for roller skates or ice skates. The footwear comprises a soft upper (4), a rigid support (5) provided with a plate (7), from which a pair of arms (8a, 8b) extend upwards to embrace and support laterally the upper (4); the footwear (3) is adapted to be associated to a frame (2) supporting two or more rollers or an ice-skating blade. The footwear further comprises an insole (6), which is made of a substantially rigid material and is contained within the soft upper (4).

### \* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*Z\* document member of the same patent family
